## QUANTUM BAITCAST REELS:

### Drag Setting

The wide-range drag on your Quantum® reel allows line to be pulled smoothly from the reel under tension without breaking. The drag, controlled by the star mechanism on the handle, may be accurately adjusted for a wide range of fishing conditions. Gradually rotate the drag control clockwise to increase the tension, counterclockwise to decrease the tension. A good rule of thumb is the drag should generally be set to approximately 1/3 the pound test of the line.

### Spool Tension Knob Setting

When using a baitcast reel the spool tension knob must be adjusted properly to allow peak casting performance. To properly set the spool tension, perform the following procedure: a) With line, lure and rod assembled, hold the rod at a 45° angle. b) Press the thumbbar while holding the spool with your thumb. c) Finely adjust the spool tension knob until the lure slowly descends to the ground as thumb pressure frees the spool. The spool should stop the instant the lure touches the ground.

### Ordering Parts For Your Quantum Reel

Refer to the parts list and diagram for your model. Locate the part you need and identify the key number for the part you wish to order for your model. Always state the model number, part number, part description and quantity on your orders. Parts may be ordered direct from the Factory Service Department, Authorized Warranty / Service Centers, and online at [www.tackleservice.com](http://www.tackleservice.com).

### Reel Service and Warranty Procedures

Reels sent in for repair or warranty service should be carefully packaged, insured and sent postage prepaid. Enclose a note explaining the nature of the problem, along with your name, return address, and reel model. Attach the dated sales receipt for warranty service. Reels returned for warranty service will be repaired or replaced at no charge. Products not covered under warranty may be repaired at a nominal charge to the purchaser, provided parts are available. For more information regarding service for your Quantum reel, please visit [www.quantumfishing.com](http://www.quantumfishing.com).

### Quick-Access Spool

Your Quantum baitcast reel has a unique bayonet-mounted side plate for quick, convenient access to the spool. This also makes cleaning and lubrication easier. Just press the button on bottom of the side cover, and rotate the cover counterclockwise about 1/4 turn. You can then pull the side cover from the frame and remove the spool. Changing spools in a baitcast reel was never easier. Plus, the sleek, ergonomic side covers and body have no external fasteners to catch line or clothing.

### Maintenance

Quantum reels are designed to exacting standards to provide you with years of precision performance when you properly maintain and lubricate. Be sure to exercise care when applying oil and grease. Overflow onto certain parts may negatively effect performance of the reel. Apply all lubricants sparingly, and wipe off any excess before using. We recommend you have your Quantum reel professionally cleaned at least once a year at a Quantum Service Center in your area.

### Quantum® LIMITED One (1) Year WARRANTY
